2027 CHEVROLET EQUINOX

# Equinox Adds Cabin Camera

PRESS RELEASE

With bold styling, affordable technology and plenty of cargo space, the 2027 Chevrolet Equinox is ready for whatever the day brings. At the center of the SUV is an 11.3-inch infotainment touchscreen that keeps apps and entertainment within reach, and available all-wheel drive and more than 15 standard safety and driver assistance features help support drivers on the road.

With more than 20 years of production and more than 3 million units sold, the Equinox is a long-term leader in the compact SUV segment, the market's largest.

The 2027 Chevrolet Equinox compact SUV starts at $29,700 and pairs truck-inspired styling with an 11.3-inch touchscreen, more than 15 standard safety and driver assistance features and available all-wheel drive.

## WHAT'S NEW

For 2027, an eight-speed automatic transmission replaces the continuously variable transmission on front-wheel-drive models. All-wheel-drive models already use an eight-speed automatic.

An interior camera enables Cabin Glance, which shows a view of the rear seat on the center screen, and Security Recording. The Black with Red Accents interior on the RS trim now features only Torch Red stitching, and Autumn Harvest Metallic joins the exterior color palette.

## EXPRESSIVE EXTERIOR

The Equinox has bodylines inspired by the strong proportions of the Chevy truck lineup and its larger sibling, the Traverse.

"This generation of Equinox has taken on a broad-shouldered, athletic appearance that conveys confidence and versatility," said Phil Zak, executive design director for Global Chevrolet.

Squared wheel openings and fender flares add visual muscle, and a distinctive C-pillar shark fin adds the appearance of motion even when the Equinox is standing still. All-LED lighting features striking light elements at the front and rear.

## INTERIOR TECH

In front of the driver is an 11-inch configurable driver information center, layered beside the 11.3-inch infotainment screen, which provides access to music, media, maps and other connected services through Google built-in. Apple CarPlay and Android Auto compatibility is included, and HD Surround Vision is available.

An electronic transmission selector on the steering column opens more storage space beneath the infotainment screen. A 60/40-split folding rear seat allows up to 63.5 cubic feet of storage with both seats folded, or 29.8 cubic feet behind the rear seat, and a hidden rear cargo floor adds more space.

## CAPABILITY

The Equinox is powered by a 1.5-liter turbocharged four-cylinder engine rated at 175 horsepower and 203 lb-ft of torque.

All-wheel-drive models can tow up to 1,500 pounds when properly equipped. A drive mode selector dial is standard on all trims.

## SAFETY

Standard Chevy Safety Assist includes Automatic Emergency Braking, Forward Collision Alert, Front Pedestrian and Bicyclist Braking, Lane Keep Assist with Lane Departure Warning and IntelliBeam auto high beams. Adaptive Cruise Control, Lane Change Alert with Side Blind Zone Alert, Side Bicyclist Alert, Rear Cross Traffic Braking and Rear Park Assist are also standard.

## THREE TRIMS

The Equinox LT is where style meets versatility, with 17-inch aluminum wheels, heated front seats and a heated steering wheel. The RS stands out with black mirrors, moldings, emblems and badging, a flat-bottom steering wheel and 19-inch wheels, with 20-inch wheels and a two-tone black roof available. The adventure-ready ACTIV features a rugged front fascia with vertical grille inserts, all-terrain tires, a uniquely tuned suspension, Evotex and sueded microfiber seating surfaces and an available white roof for a two-tone finish.

## PRICING

The 2027 Equinox LT starts at $29,700. The RS starts at $34,500 and the ACTIV at $34,600. Prices exclude destination freight charge, tax, title, license and dealer fees.
