2027 CHEVROLET TRAX

# Trax Gets a Fresh Look

PRESS RELEASE

Chevrolet has announced updates to its most affordable vehicles, including the 2027 Trax, providing fresh design, additional safety and driver assistance features and upgraded technology at an exceptional value.

The Trax is the small SUV segment leader, accounting for one-fifth of the segment's volume, according to Chevrolet.

"Trax and Trailblazer combined are currently having their best sales year ever, with more than a quarter-million vehicles delivered year-to-date. Chevrolet is investing in the segment at the right time," said Scott Bell, vice president of Global Chevrolet. "With both these nameplates, Chevrolet sells more vehicles in the small SUV segment than anyone else, and these updates will make them an even stronger option for customers, with more standard safety, improved tech and a refreshed design."

The 2027 Chevrolet Trax adopts a more premium look with a new grille, new wheel designs and all-LED taillamps, and adds more than 20 standard safety and driver assistance features.

## PREMIUM DESIGN

The 2027 Trax adopts a more premium look and feel, highlighted by a new grille, new wheel designs, all-LED taillamps and a redesigned liftgate. Distinct trim-level details reinforce each model's individual character.

Inside, distinctive hexagonal side vents give the instrument panel a fresh, modern appearance. Storm Sky Gray, an all-new interior color for the Chevrolet brand, makes its debut, offering a more natural, earthy tone. A power liftgate is available on the Trax for the first time.

## STREAMLINED TRIMS

The 2027 Trax has streamlined its trim offerings and will be available as an entry-level Trax, RS and ACTIV.

The entry-level Trax features wheels with a higher-contrast finish for a more urban look. The RS emphasizes its sporty personality with 19-inch wheels, the largest available across all trims. The ACTIV maintains an adventure-inspired look, including a unique front-end design.

## STANDARD SAFETY

An upgraded electrical and software architecture enables more than 20 standard safety and driver assistance features on the 2027 Trax, including Adaptive Cruise Control, Front and Rear Park Assist, Safety Alert Seat and Blind Zone Steering Assist.

New standard safety features for 2027 include Reverse Automatic Braking, Side Bicyclist Alert, Rear Cross Traffic Braking, Front Park Assist, a Rear Seat Belt Indicator and Intersection Automatic Emergency Braking.

## UPGRADED TECHNOLOGY

Google built-in with Gemini is included in a user interface that features a new, larger standard 11-inch driver information center and an 11.3-inch infotainment screen. Newly available OnStar One, included for 12 months, adds the full suite of OnStar services, including in-vehicle Wi-Fi hotspot capability and video streaming.

## POWER AND ROOM

The Trax has been powered by a 1.2-liter turbocharged three-cylinder engine rated at 137 horsepower and 162 lb-ft of torque, paired with a six-speed automatic transmission. The 2026 model was EPA-rated at 28 mpg city and 32 mpg highway. Chevrolet has not yet released 2027 powertrain specifications.

The Trax offers 25.6 cubic feet of cargo space behind the rear seat and 54.1 cubic feet with the rear seat folded, along with 41.9 inches of front legroom and 38.7 inches of rear legroom.

## PRICING

The 2027 Trax will be available to order in February 2027. Chevrolet has not yet announced pricing. The Trax will be assembled with domestically and globally sourced parts.
